Attached is the latest summary report from the ASPECT overflights. ASPECT is returning to Addison to replace a sensor and a brief rest for the crew. They will be on call for an emergency tonight and prepared to operate out of the Houston Hobby airport for the next few days. If not called out tonight they will be airborne by 0500.

Attached is the latest version of the ASPECT "living" summary
report. It will be the final report for today.

Key additions include (1) infrared images, (2) additional spectra
for benzoyl peroxide, (3) new/updated operational challenges, (4)
current ASPECT team and aircrew members.

Please send any questions or comments on the report to John
Cardarelli.

Please address all questions about ASPECT activities to Mark
Thomas.

Refueling ops have been completed. The crew was able to push a large amount of data up to the server. We are working the data at this time. We are returning to the Arkema site ASAP.

The team is just about to start full resolution processing of the most recent data. I will send out products as soon as possible.
